cancelled after the registration due date.
Late registration may not guarantee your
seat at the meeting.

The Honorable John Engler
President and CEO
National Association of Manufacturers

As the United States appears to be on
the road to economic recovery,
manufacturers in every industrial sector
still face tremendous challenges.

Decreasing numbers of skilled
workers, faltering infrastructure,
increasing energy costs, and a difficult
regulatory environment confront efforts
to maintain and improve the
competitiveness of American firms.

On Monday, June 21, 2010, the Japan Commerce Association of Washington, DC, invites a leading advocate for the nearly 12 million individuals employed directly in manufacturing in the United States, Mr. John Engler, President and CEO of the National Association of Manufacturers (NAM), the largest industry trade group in America representing small and large manufacturers in all 50 states, will discuss Manufacturing Renewal in United States: What it will take and why it matters.

Engler is one of the nation's top advocates for developing domestic energy supplies in the U.S. to meet the needs of a growing economy. Under his leadership, the NAM has also gained national recognition for its support of rebuilding and expanding U.S. infrastructure critical to industry's ability to compete in the global marketplace. Mr. Engler also focuses on competitiveness through innovation, focusing on research and development, implementation of information technology – including in the area of health care – intellectual property rights, visas for skilled foreign workers and education and training.

Mr. Engler served as Governor of the State of Michigan for 12 years, preceded by 20 years in the State Legislature. He graduated from Michigan State University with a Bachelor of Science degree in Agricultural Economics. He also holds a Juris Doctorate from Thomas M. Cooley Law School.

We hope that you can join us for this timely event.
